WEB BASED SELF-PACED TRAINING

Web based training is available for Detroit Diesel Engines, Freightliner Trucks along with many of the vendors we use:

The Engine side consists of Series 60, MBE 900, MBE 4000 and DD platforms consisting of 3 engines.

The Truck side consists of the learning center on AccessFreightliner covering basic electrical, HVAC, troubleshooting, advanced electronics and truck specific training.

Many of these web based courses are required to attend our Instructor Led Training classes offered in-house.

All the web based training counts towards your TechPro points system which in turn helps you achieve top level. (See Technician Profiles when you click on your browsers Back button for more detailed explanation.)
